
Arma 2 Operation Arrowhead Cracked Multiplayer ~REPACK~

Design Not exactly a triumph of revolutionary gameplay design, Operation Arrowhead/Arma 2 is still a good-to-very-good game, albeit with a handful of shortcomings, such as a few design errors and a glitchy AI (which affects the game in a significant way). The main purpose of the game is to fight a Cold War between two nations, which are both experiencing large-scale social and political changes. It is the most realistic

shooter out there right now, and this is why you will have to deal with a lot of bugs, poorly-done voice overs, the occasional crash when you kill someone, an ugly UI, and (in certain cases) a difficult level of difficulty. This is also the reason why most of the reviews published online are quite bad. Gameplay In this game, you can only carry one weapon at a time. You can also carry up to four pieces of equipment. Moreover, the main

weapon is stored in your backpack, while the other weapons and the equipment are stored in different types of containers located in the battlefield. The game allows you to play the campaign solo, or with up to three additional players. Multiplayer mode in Operation Arrowhead involves several missions, which can be played by up to 6 players on a single server. Plot The main scenario is set in the 1980s

against a backdrop of the Cold War. The setting of the game revolves around two opposing factions: the United States, which is portrayed as the good team and Slovakia as the bad. The gameplay is set in fictional Middle Europe. Reception

Although the game received a few patches to work around the AI bugs, the game was originally released with many issues, which did not improve until the game was released as a full-

blown DLC. As the game was released in December 2011 and did not have any major updates until the full-blown DLC, it is considered to be a bad game.

After the release of the DLC Operation Arrowhead, the game was no longer playable on the PC. References External links
