(a) Field of the Invention The present invention relates to a function of a cap, and in particular, to a cap having a built-in frame that can be used for various functions and/or functions such as lamination, insulation, and external decoration. (b) Description of the Related Art A conventional cap has a cap main body connected by a hinge to an upper end of a shaft and a hinge cover coupled to the hinge main body. In such a cap, when a user wears the cap on his or her head, the cap maintains a circular shape, providing a fairly stable appearance. However, such conventional caps do not provide an external appearance appropriate for various functions, such as, insulation, external decoration 1cdb36666d
